

SIH 2026: COOPERATIVE GIG SERVICES PLATFORM

Strategic Research Blueprint, Competitive Differentiation & Team Execution Guide

Problem Statement Essence: Private corporate aggregators (Urban Company, TaskRabbit) dominate household gig services with high commission cuts (20-30%) and zero worker ownership. Meanwhile, millions of certified workers in Labour Cooperative Federations remain digitally invisible. This blueprint defines how our platform bridges this gap to ensure **Fair Wages, Worker Social Security, and Consumer Trust** while winning SIH 2026.

1. Core Problem Anatomy: Private Platforms vs. Cooperative Model

To win SIH, the jury needs to see that we understand the exact socio-economic and market failures of existing private aggregators:

Evaluation Metric	Private Aggregators (Status Quo)	Our Cooperative Platform (Fixly/GigConnect)
Worker Commission	20% - 32% deducted from every job	0% to 5% Max (Cooperative Welfare Fund)
Wage Control	Opaque algorithmic dynamic pricing; workers bear race-to-the-bottom	Federation Minimum Wage Floor legally protected by trade category
Social Security	Zero formal benefits, accidental cover, or retirement welfare	Automated 5% micro-deduction into Welfare & Insurance Account
Customer Pricing	Heavy markup, convenience fees, surge surge exploitation	Transparent direct rates; emergency SOS fixed surcharge
Governance	Venture capital shareholder maximization	Democratic 3-tier federation: State -> Primary Society -> Worker

2. Strategic Pricing Architecture (Customer & Worker Retention)

The Dual-Incentive Formula: Customers join when quality is verified and pricing is lower or equal to market; workers join when net earnings are significantly higher with social security.

Trade Category	Private Market Rate	Our Base Rate	Worker Net Payout (Ours)	Welfare Fund (5%)
Plumbing (Leakage / Tap)	Rs 450 (Worker gets Rs 315)	Rs 350	Rs 332.50 (+5.5% vs Private)	Rs 17.50
Electrical (Short Circuit / Fuse)	Rs 499 (Worker gets Rs 350)	Rs 400	Rs 380.00 (+8.5% vs Private)	Rs 20.00
Carpentry (Door / Lock repair)	Rs 500 (Worker gets Rs 350)	Rs 400	Rs 380.00 (+8.5% vs Private)	Rs 20.00
Home Cleaning (Deep Sanitization)	Rs 1200 (Worker gets Rs 840)	Rs 950	Rs 902.50 (+7.4% vs Private)	Rs 47.50
Appliance / AC Servicing	Rs 799 (Worker gets Rs 550)	Rs 650	Rs 617.50 (+12.2% vs Private)	Rs 32.50

3. Field Research & Data Collection Roadmap (What the Team Must Collect)

To present authoritative primary research during SIH jury evaluation, the team must collect concrete local data across 3 pillars:

Research Pillar	Target Subjects	Key Metrics & Questions to Gather	Deliverable in Pitch
Pillar A: Worker Reality Check	15-20 local electricians, plumbers, painters	1. How much cut do Urban Company/local contractors take? 2. How many days per month do they get zero calls? 3. Do they have Ayushman Bharat or accidental insurance?	Worker Pain Point Infographic with real testimonials
Pillar B: Household Trust & Friction	25-30 middle-class households / societies	1. Why do they hesitate hiring from roadside nakas? (Safety, lack of price guarantee) 2. What is their willingness to book via voice/Hindi audio? 3. What price is considered 'fair'?	Customer Survey Chart proving demand for verified cooperatives
Pillar C: Cooperative Federation Audit	Local Labour Cooperative Society / e-Shram office	1. How are primary societies registered under Multi-State Cooperative Societies Act? 2. What minimum wage standards exist in state labor gazettes? 3. Existing welfare funds available.	Policy Alignment Slide proving compliance with national cooperative goals

4. 6-Member Team Role Distribution & Milestone Action Plan

Clear responsibility breakdown ensures every member works in parallel without bottlenecks:

Member	Assigned Domain	Primary Responsibilities	SIH Defense Focus
Member 1	Backend & Cloud Architecture	Express REST APIs, Redis session cache, MongoDB schemas, AWS Docker/CI-CD deployment.	System scalability, sub-50ms latency, high security (JWT/NoSQL guards).
Member 2	Flutter Mobile App (Customer)	Booking UI, Google Map live tracking, 'Hey Flexi' Voice Mic with TTS, Hindi/English toggle.	Elderly/non-tech-savvy usability, accessibility, offline responsiveness.
Member 3	Flutter Mobile App (Worker)	SOS alert receiver, OTP arrival verify, itemized wallet with gross/deduction card, digital ID card.	Transparent earnings display, zero-literacy audio prompts for workers.
Member 4	Web Admin & Federation Portal	Federation minimum wage control, Primary society registration, worker KYC verification table.	Cooperative governance transparency, wage floor enforcement proof.
Member 5	AI/ML Engine & Analytics	AI Demand Forecasting & workforce allocation clusters, LangChain conversational prompt refinement.	Explainable AI, dynamic surge mitigation, fair work allocation algorithm.
Member 6	Research, Pitch & UX Validation	Field interviews (Workers + Customers), competitor cost analysis, PPT deck, video walkthrough demo.	Business feasibility, Ministry alignment, financial sustainability model.

5. 'Winning Edge' Differentiators to Emphasize in the Presentation

- Not Just Another Uber for Plumbers:** Emphasize cooperative ownership. Workers are legal members with dividend share and emergency welfare, not disposable contractors.
- Voice-First Conversational AI ('Hey Flexi'):** Solves the digital divide. Non-English speaking workers and elderly homemakers can book or manage jobs in pure Hindi.

- 3. Zero-Ghost Booking Guarantee:** Inactivity session aborts (60s TTL) and anti-fake verification protect cooperative workers from malicious prank requests and wasted travel time.
- 4. Complete Financial Audit Trail:** Razorpay checkout with dynamic 0% platform fee and automated 5% social security welfare fund transfer to primary societies.
- 5. Predictive Geo-Spatial Dispatch:** Demand forecast clustering ensures workers are placed in high-need municipal zones before emergencies spike.
